A COMPANY OF THE VEKA UK GROUP

The Bowater DUO
Composite Door

More than just a door

Welcome

Step on in; take a seat, welcome home. Enjoy this brochure and discover your perfect door.

Your front door is the entrance to your home, the focal point to your property and the first thing that people will touch and see when they visit you and your family. Here at Bowater Doors we know that doors shouldn't only look stunning but they should perform outstandingly too. Each of our doors will give you strength, security and we will handcraft your door in our Midlands workshop to fit your requirements. Keep the cold and intruders out with your Bowater Door, step on in, its warm inside.

So take a seat, and let us create a door for you that suits your style.

Bowater Doors is one of the leading Composite Door Manufacturers in the UK

Bowater Doors is one of the UK's leading composite door manufacturers. With decades of experience we make sure that the skills and expertise we have built over the years go into everything we do.

Our doors are handcrafted in our workshop in Minworth. As our doors are made to order, every single door is unique and handcrafted to a superb quality.

Bowater Doors is a part of the worldwide The VEKA UK Group, a family owned, global business, renowned for its eco-credentials, outstanding customer service and industry-leading products.

Why choose a Composite Door?

We understand that home security is your number one priority when it comes to safeguarding your family and your possessions. So, as well as being inviting and welcoming visitors into your home, your front door should also be robust enough to act as an impenetrable barrier to intruders. You can be confident that with the state-of-the-art security features of our Bowater Door including their steel reinforcement, multipoint locking and the fact that they have the additional option of being 'Secured by Design' police approved, you can feel safe and sound in your own home.

As well as ensuring security, your Bowater Door will look beautiful too and will be easy to maintain. Composite doors offer the look and feel of a traditional timber door without the need for maintenance. They also offer dramatically improved energy efficiency. With this in mind, we've made sure that the Bowater DUO Composite door can achieve a U-Value of 1.6 or less.

As our composite doors are handcrafted to order, we can offer you an extensive range of colours, styles and woodgrain effects with a wide variety of glazing options to suit your style perfectly.

Introducing DUO doors – the ultimate in flawless performance

You can trust in Bowater Doors that your DUO door will have flawless performance. Not all composite doors are the same, you need to choose one that only lasts, but also gives the ultimate in security and energy efficiency.

The performance of each Bowater Door is fully guaranteed for ten years, but each one has been designed to look good and perform flawlessly for much longer, giving you decades of low-maintenance, high security, energy efficiency and great looks.

Keep the warmth in and the cold out

We have ensured that we pay attention to every detail when it comes to what matters to you the most, we want to make sure you're warm and safe in your home.

The fact that each DUO door is 54% thicker than a standard composite door and double rebated as standard is a huge contributor to retaining heat, helping the environment and reducing energy bills. The double compression seals where the door meets the frame is yet another barrier to keep out the cold.

Personalise your door and let the light flood into your home by choosing from an extensive range of glazing options. Not only will this add character to your home, but we can make sure that your glazing is as energy efficient as your door. Even more so through choosing triple glazing.

54% thicker than a standard single rebate composite door

Doors come fully framed, with hardware and glazed so you can order all parts at once

Galvanised steel reinforcement

The door leaf and frame are handcrafted in Britain to a unique specification tailored to your needs

Improved thermal and acoustic insulation thanks to double compression seals

Colour

Choose from our range of stunning standard colours or create a something a little different by selecting any RAL colour of your choice. Whether you want to go for a modern and striking look or a timeless and elegant entrance you can suit your style through our huge variety of colour options.

Choosing a bright colour will brighten up your entrance in the winter and in the summer it will look great with the greenery outside, providing a stylish and attractive entrance to your visitors.

Couple your colour with your choice of door furniture and glazing and create a door truly bespoke to your style.

Available in any
RAL colour

Make an impression

Your front door is the first thing that visitors will see as they approach your home, so why not give a lasting impression of your home by setting the standards of quality and beauty at your front door.

The woodgrain finish on our composite door adds further depth to your chosen colour and is a very low maintenance option to a traditional timber door which requires hours of repainting. Your chosen colour will not fade in the sun and will only look more striking and beautiful.

If you don't want to go for the standard white interior then why not carry the colour through your home. Or mix and match by choosing a completely different colour to the outer door to complement the interiors of your home.

Personalise your door by choosing from a huge palette of RAL colours, so that at the end of a hard day you'll come home to be greeted by your favourite colour. Simply let us know your colour choice and we can create your Bowater Door like no other.

Once you have made the important decision about the colour of your new front door, you want it to stay looking bright and colourful. That's why the external surface of a Bowater Composite Door panel is made from Glass Reinforced Polymer. GRP is a highly durable material that is more hard-wearing than a traditional painted timber door. So your Bowater Door will remain a colourful addition to your home for many years to come.

From any home type whether you live in a shingled cottage by the sea, a contemporary new build, a red brick terrace or a stone built house in the countryside we can inspire you to discover the perfect colour for your new Bowater Composite Door.

Shhhh!

Not only do our DUO doors offer the highest level of thermal efficiency and in turn reduce your heating bills, you can also count on them to keep out the noise. So you can leave the stresses of the outside world behind when you close the door.

Noise reduction on the DUO door is exceptional as each door in the range is 68mm thick. The high density core will keep out the sounds of traffic, noisy neighbours and the world outside. So you can enjoy the peace and quiet that you deserve.

Do you want to add decorative glass to your door? We have triple glazing in selected styles, further improving acoustic insulation.

The DUO door range
- for sound reduction that's
worth shouting about!

Hard working hardware

With our carefully chosen selection of hardware you can further personalise your door and really make a statement.

Our hardware offers high performance, security and quality. Teamed with the multipoint locking system which will run the length of your door, your DUO door will be tight, secure, weatherproof and will look the part too!

Whether your door is modern or traditional we have a variety of finishes including black, white, chrome or gold which can match your door knockers, security chains and spyholes if you choose to have them.

Your Bowater DUO door will provide you with the upmost security, so you can have peace of mind that you will be safe and secure in your own home.

Safe and sound

Every Bowater door is fitted with an extremely secure police approved multipoint locking system. Measuring at 68mm, not only is your DUO door 54% thicker than a standard composite door, you will also have the option of your door being Secured by Design approved meaning you will have the highest level of security.

When we handcraft our doors, from design stage until our Installers hand you your key, we make sure that it meets or exceeds all current British Standards. These include PAS23 (BS6375), PAS24 and 'Secured by Design' – the official Police security initiative.

'Secured by Design' is only awarded to products which offer exceptional security features. The flagship scheme recognises products which incorporate effective crime prevention solutions at the design stage; the accreditation is only awarded to products which pass stringent testing. The range makes use of the most reliable, trusted technology and hardware in the industry. Each door has been designed to provide a formidable barrier against even the most determined intruder – so you know that your visitors will be by invitation only!

The high quality sub-frame is individually constructed to match every door size exactly, without 'cutting it down to fit' and has galvanised steel reinforcement in both the door frame and outer frame. The DUO door combines strength and stability with robust joints locking everything tightly in place.

54% thicker than most standard composite or timber doors, the Bowater DUO Composite Door range offers complete peace of mind.

Secured by Design

Official Police Security Initiative

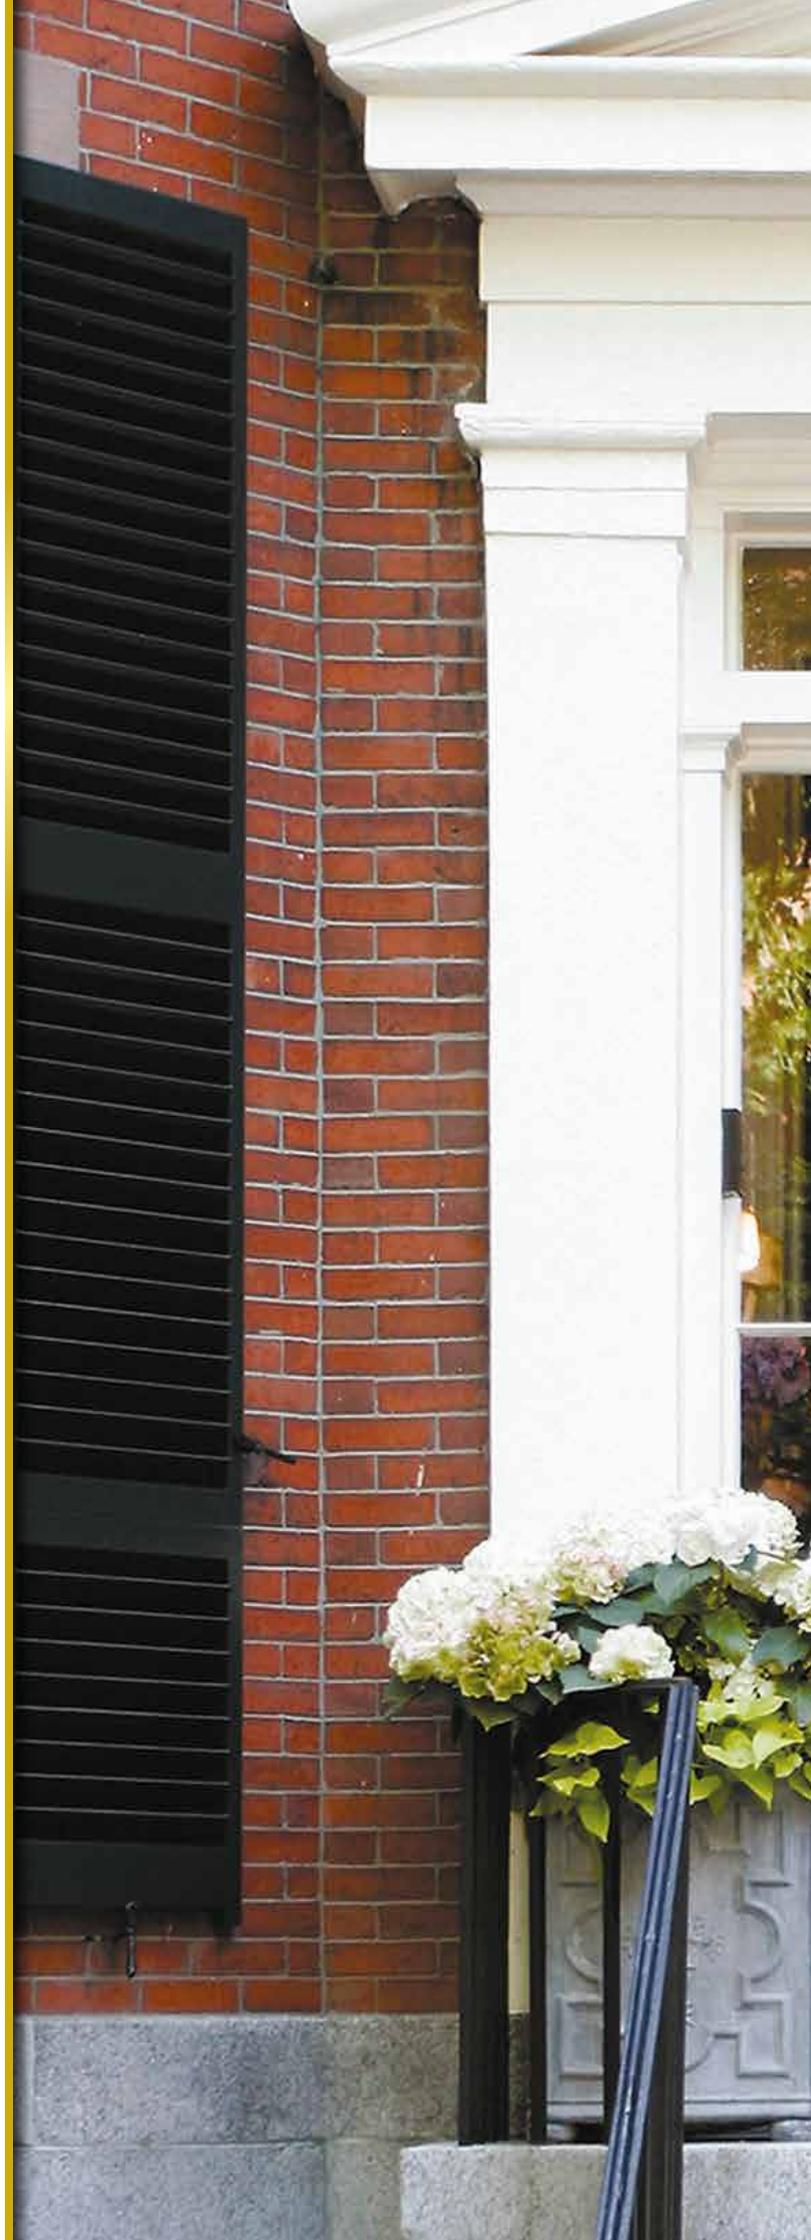

A stylish welcome

Your front door is one of the first things that people will see when they visit your house. Create a beautiful entrance to your home and choose from a wide range of colours, styles, glazing and finishing options. Whether you prefer time-honoured and traditional, or contemporary and cutting-edge, we can handcraft a door to suit your style.

Our doors are handmade to order so you have the choice of creating a door to the exact specification that you like. You can choose from a huge range of colours, glass, furniture and finishes to create a door bespoke to your requirements.

We have designed the DUO door range with symmetry and style in mind; we handcraft our doors in our workshop in Britain and make sure that each individual door is finished with attention to detail at every stage. We use the strongest, low-maintenance materials and thanks to their extra sharp woodgrain definition, they are virtually indistinguishable from a timber door, with a huge range of exceptional modern advantages.

The tough GRP skin adds not only good looks; it means your door will be able to withstand any knocks and scratches. We have developed our doors so they have been tested to withstand extreme UV rays. Rest assured that your DUO door will not fade in strong sunlight so you can choose a door in any colour without the risk of fading.

The choice is yours

A well-made, well-chosen door will not only improve the appearance of your home, it will also add value. Enjoy browsing through the thousands of possibilities of door combinations and create a door that will stand the test of time with strength, security and style.
